

How much energy does Madagascar use a year?

However, energy consumption per inhabitant remains one of the lowest in the world, around 0.315 toe/year in this area, as the world average is around 1.6 toe/year. During the last two years Madagascar is ranked as the 188-th over 189 economies in terms of getting electricity,.

Which energy sources are used in Madagascar?

According to the energy inventory drawn up by the MEM 4 and the study report of the CREAM 5, wood energy has the highest share (92%) in the total energy supply in Madagascar, followed by fossil fuel (7%). Only less than 1% of this demand is supplied by other renewable energy sources.

How many electrification projects are there in Madagascar?

1. 2. 3. Solar photovoltaic system of 7 kW power located in the south part of Madagascar, since 2006. Funded by ADER, implementation of rural electrification projects mainly depends on partnership with private operators. According to a diagnostic report of the MEM, ADER counted about 140 electrification projects from 2004 to 2012.

Does Madagascar have a high solar energy potential?

Due to its location, Madagascar has a high solar energy potential. As shown in Fig. 5, the Global horizontal irradiation is 2000 kWh/m². Almost all regions have more than 2800 h (350 sunny days) of annual solar radiation. In the west coast, solar radiation ranges from 4000 to 6500 kWh/m²,.

Does Madagascar have an energy transition?

Madagascar has not yet completed its demographic transition and will have to ensure effective planning and management of its energy transition. The access to electricity is particularly dichotomous between rural region and main urban areas such as Antananarivo, Diego, Majunga.

Can marine energy be used in Madagascar?

The use of marine energies can be considered for Madagascar and particularly with OTEC, wave power and tidal barrages. The ocean current power or the tidal current turbines do not have potential for Madagascar.

3.4.1. Ocean thermal energy conversion (OTEC)
