

What is Romania's energy storage policy?

Energy Policy Group (2020), Romania's Energy Storage: Assessment of Potential and Regulatory Framework, December 2020. The European Green Deal, with its flagship policy, the Climate Law, is set to enshrine into law the target of net-zero greenhouse gas (GHG) emissions by 2050.

Can storage technologies improve energy security in Romania?

Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists 'developing storage capacities' as an instrument to improve energy security but lacks detail on how storage technologies will be deployed until 2030.

What are some examples of energy security issues in Romania?

One example is Romania's NECP, which at first did not address storage technology. The updated version of 2020 was marginally improved in this respect, listing 'developing storage capacities' as an instrument to improve energy security, but lacking detail on the storage capacity to be developed until 2030.

O českých bateriích HE3DA se mluvilo jako o prelomovým vynálezem. S postupem času se však objevuje i skepse. Jejich výrobce společnost Magna Energy Storage sice otevřela továrnu v Horní Suché na Karvinsku už před čtyřmi lety, o uplatnění technologie v praxi je toho ale zatím jen málo a finanční situace firmy není dobrá.
