

The BESS project, valued as a ground-breaking initiative, boasts a 20-megawatt battery energy storage system, a first-of-its-kind in Africa. Scheduled to be fully operational by June 2025, this innovative system is designed to enhance security and reliability by storing energy during low-usage hours for release during peak demand.

Lilongwe, Malawi | 25 th November 2024 - The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe. This is GEAPP's first BESS project in Africa.

This innovative system, which marks a first for Malawi, aims to revolutionize the storage and distribution of electricity by providing backup power during outages, stabilizing the national grid, and supporting renewable energy integration.

Malawi and GEAPP will begin constructing Africa's first 20 MW battery energy storage system (BESS) in Lilongwe, which is set to be completed in 2025. The \$20 million BESS project will stabilise Malawi's hydropower-reliant grid, enhance electricity access, and reduce carbon emissions by 10,000 tonnes annually.

Malawi is taking a significant step toward securing its energy future by constructing its first battery-energy storage system. This critical project aims to protect the nation's electricity grid from the impacts of extreme weather, including cyclones, which have severely disrupted power supply in recent years.

Malawi's electricity utility has broken ground on a solar power and battery storage project aimed at increasing the country's power generation capacity. This is the first phase of the scalable 20MW Salima solar power ...

President Lazarus Chakwera has today officially launched the Battery Energy Storage System (BESS) project by the Electricity Supply Corporation of Malawi (Escom) at Kanengo in Lilongwe. The \$20.2 million initiative, supported by the Global Energy Alliance for People and Planet (Geapp), is poised to revolutionize electricity reliability and ...

The \$20.2 million initiative, implemented by the Electricity Supply Corporation of Malawi (Escom), is backed by the Global Energy Alliance for People and Planet (GEAPP). Escom Board Chairperson Morgan Tembo hailed the launch as a transformative milestone for the country's energy sector.

Lilongwe, Malawi | 25 th November 2024 - The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW ...

Malawi's electricity utility has broken ground on a solar power and battery storage project aimed at increasing the country's power generation capacity. This is the first phase of the scalable 20MW Salima solar power plant that will ...

Malawi is constructing its first battery-energy storage system to bolster its grid against outages caused by cyclones. The 20-megawatt project, supported by \$20 million from the Global Energy Alliance for People and Planet, is scheduled for completion next year, with additional funding from the Malawian government and state utility ESCOM.
