

Zorlu Enerji'nin sürdürülebilirlik alanında hayata geçirildiği en büyük yatırımlardan biri olan elektrikli sarj istasyonu ağı Zorlu Energy Solutions (ZES), kesintisiz yolculuk deneyimini ulaştırılabilir hale getirmek için verdiği hizmeti her gün biraz daha ileriye taşıyor.

ZES, within the scope of energy efficiency solutions, continues its research and investment activities in the field of solar energy, which is one of the areas where our country has high potential in terms of clean, green and sustainable energy.

Acting with the principle of undertaking projects which contribute to sustainability in every aspect, Zorlu Enerji aims to further increase the share of renewables in its generation portfolio, particularly of geothermal and solar energy, and enhance its resource diversity.

Kuwait Investment Authority (KIA) acquired Zorlu Energy Solutions (ZES) for USD50 million. ZES is a electric vehicle charging company, a subsidiary of Zorlu Energy and Zorlu Holding, announced that KIA would gain the full shares of the company, according to the release at Public Disclosure Platform (KAP).

The company's activities include developing projects to meet all kinds of energy, steam and heat needs, establishing feasibility and establishing electrical energy production facilities based on all kinds of renewable energy sources and selling the energy produced in these facilities.
