In 2017, Travers 2 Solar LP retained Matrix Solutions to support the environmental components of the Travers Solar Project in Vulcan County, Alberta. The project is being developed on approximately 1,350 hectares of agricultural land ...

Power Supplies I had from the first year. At 80% all white, 300 pixels were pulling 7.2A. I had set up power injection where the first LED was connected to the last LED in a local power injection configuration - that kept all pixels lit well without requiring the power injection services of the Distro next to it.
