

Today, as a European leader, we use the best available solutions to create battery systems that can perform better and last longer. Our products, powered by unparalleled technological expertise, provide tangible value to customers around the world.

Design a complete battery system, ensuring high performance and quality. Secure component sourcing for battery cells and other components. Create in-house prototypes at each stage of the project.

Already a strong fleet of five regenerators, Battery Plus Indian Ocean has entrusted the development of battery regeneration activity in the territory of Mayotte. The three new partners have acquired a sixth regenerators, already established in the territory, bringing to seven the total number of regenerators in this island area.

Design a complete battery system, ensuring high performance and quality. Secure component sourcing for battery cells and other components. Create in-house prototypes at each stage of ...

The Albioma-Mayotte Battery Energy Storage System is a 7.4MW battery energy storage project located in Mayotte, France. The rated storage capacity of the project is 14.9MWh. Albioma-Mayotte Battery Energy Storage System Project profile includes core details such as project name, technology, status, capacity, project proponents (owners ...

The Albioma-Mayotte Battery Energy Storage System is being developed by Albioma. The key applications of the project are renewable energy integration, electric energy time shift and grid support services.

Albioma's battery storage will provide an energy arbitration service for the grid operator and load balancing between peak and low consumption times. It will also allow for greater penetration of renewables and solar power in particular into the Mayotte network.

We offer a variety of lithium-ion batteries, including the 24V lithium battery, 36V lithium battery, and 48V lithium battery. Our high-capacity lithium batteries are perfect for applications that require a lot of energy storage, while our high-power lithium batteries are ideal for applications that require a lot of power.
