To access our energy reporting dashboard please get in touch. This will provide records for gas safe forms, F-gas registers, customer reporting and engineer job sheets all stored on our secure cloud based servers so that customers can access the specific data for their site, plant and equipment at any point they require 24-hrs per day. Customers whom opt for this value added ...

Energy in Switzerland is transitioning towards sustainability, targeting net zero emissions by 2050 and a 50% reduction in greenhouse gas emissions by 2030. [1] [2]Switzerland's energy relies mainly on hydroelectric, nuclear, and natural gas, as well as imported petroleum for cars since Switzerland produces no fossil fuels. Launched in 2011, the 2050 Energy Strategy aims to shift ...

Energy consumption per capita has been declining in Switzerland for years: although the population grew by 28.7% between 1990 and 2020, energy consumption decreased by 5.9% during the same period. Most energy consumed in Switzerland is in the form of petroleum and motor fuels (43%), followed by electricity (26%) and gas (15%).

For four decades MCL Energy has been providing steam boiler maintenance, commercial gas heating, air conditioning, refrigeration, and HVAC services to a variety of customers both public, private, commercial and industrial in nature. Our aim is to provide the optimal maintenance and support solution to your organisation.
