

Does Iraq have a good power sector?

As a major producer, Iraq's electricity sector is almost entirely dependent on fossil fuels, which account for more than 80% of power generation. Despite its vast energy resources, the performance of the country's power sector is sub-optimal.

What type of energy is used in Iraq?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iraq: How much of the country's energy comes from nuclear power?

What is Iraq's refining capacity?

Iraq's total operating refining capacity is about 1.2 million b/d.²⁷ The Iraqi government plans to reduce petroleum product imports by rehabilitating the refining sector and building new refineries, but the government has struggled in its efforts to attract the foreign investment needed in the downstream sector.

Can Iraq cut its electricity network losses?

The new IEA report, Iraq's Energy Sector: A Roadmap to a Brighter Future, maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector. The analysis finds Iraq has huge potential to cut its electricity network losses, which are among the highest in the world.

How many thermal power plants does Iraq have?

Since 2021, Iraq has started operating three thermal power plants with a combined capacity of 2.6 GW, and Iraq has plans to add 6 GW of new generation capacity by 2025. Iraq also plans to increase the energy efficiency of existing plants and other electric power sector infrastructure.⁶⁴

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.
