Who makes Greystone HVAC sensors & transmitters?

Founded in 1983 and headquartered in Moncton, NB, Greystone is a recognized manufacturer of HVAC sensors and transmitters for Building Automation Management Systems. With over 40 years of experience, the company designs, manufactures, and supplies products to meet the needs of global markets.

When did Greystone become a global company?

Since its inception, Greystone's leadership has had a global focus on growth, expanding into the United States in 1987, into South East Asia shortly later in 1989, and finally expanding into the Middle East in 1998.

Are Greystone products designed & tested in-house?

Using the latest design tools, internal collaboration and customer input, all Greystone products are designed & tested in-house to provide market focused products. LEAN MANUFACTURING

Why should you choose Greystone?

Distributors, contractors, and facility engineers have trust in the Greystone brand delivering quality assured and competitive priced products to their commercial and light industrial projects. Greystone is one of North America's largest ISO registered manufacturers of HVAC sensors and transmitters.

Bemsig has a strong position within the building automation field device market in Europe, and the acquisition of Greystone further strengthens Bemsig's geographical reach with a strong base in North America.
