

What is the PluggedSolar Grid-Tie Kit?

The PluggedSolar Grid-Tie Kit is an innovative and affordable solar energy solution for every homeowner who wants to save money on their monthly energy bill and help the environment. The system includes an SMA Sunnyboy inverter that has a special feature of providing power during outages without the need for added batteries.

What is a DIY grid-tie solar panel kit?

Our DIY grid-tie solar panel kits contain the core components needed to power your property with solar. Our premium solar panels are backed by top-notch technical assistance from our team of solar specialists. IronRidge builds the strongest roof and ground mounting systems in solar.

Are there any new grid-tie solar kits available?

We are in the process of designing and updating a new group of grid-tie solar kits. These will be available very soon, so keep checking back for updates. Please email us or give us a call if you need a kit custom designed to your needs. Our kits provide an easy way to get started with your grid-tie solar system.

How much electricity does a solar grid tie kit generate?

A 3000-Watt Solar Grid Tie kit generates 7000 KWH of electricity (average) per year for life, saving up to 70% of electric bill by removing high tiered rated usage. To install, attach solar panels on the roof or on a ground rack and plug the electric cord into the wall socket. No wiring or battery is needed.

Should I buy a grid-tie Solar System?

Buying a grid-tie solar system is by far the most cost-effective way to go solar and offset your electric bill. However, if you want to make the most of your system and protect against power outages, consider adding backup power to your system with solar batteries.

What is expandable solar hybrid (grid-tie/off-grid) kit?

The Expandable Solar Hybrid (Grid-tie/Off-Grid) Kit is an innovative and affordable solar energy solution for homeowners. It can save money on energy bills and help the environment.
