

Who is Bermuda Electric Light Company?

In the 1950s, we decided against developing a tramway for the island and so removed the word "Traction" from the Company's name and became what we all know today as the Bermuda Electric Light Company Limited - BELCO. We embraced new technologies as we grew.

How much electricity does Bermuda use?

Large commercial organizations use about 40% of electricity produced. The standard voltage in Bermuda is 120 V and the standard frequency is 60 Hz AC. Flat, two-pronged plugs (Type A) are in use. All US and Canadian appliances work on the island, without voltage converters or adapters.

What is Bermuda's Integrated Resource Plan?

On July 26, 2019, the RA released Bermuda's first Integrated Resource Plan, which outlined the framework for Bermuda's energy requirements over the next 25 years. The IRP aimed to have 85% of Bermuda's power generated by renewable means by 2035.

MAN Energy Solutions has successfully handed over a 56 MW power plant block-unit to its customer, Bermuda Electric Light Company Ltd (BELCO). The newly constructed unit is an extension of the existing complex in Pembroke, home to Bermuda's main power station and close to the capital, Hamilton.

Most of Bermuda's electricity supply originates at BELCO's Serpentine Road plant and is transmitted via underground cables to substations, from there the electricity is distributed via overhead main lines that feed branch lines, which then supply electricity to your home or business.

This project is a significant achievement for Saturn Power, BELCO, the government and the people of Bermuda, as it is the country's first utility-scale, renewable energy facility. Using over 20,000 photovoltaic solar panels, Saturn Power developed this 6 MW AC solar photovoltaic (PV) power generation facility, at "The Finger" on St. David ...
