

Who is Freyr battery?

FREYR Battery is a developer of clean, next-generation battery technology production capacity. The Company's mission is to accelerate the decarbonization of global energy and transportation systems by producing clean, cost-competitive batteries.

Could Freyr become a global battery powerhouse?

Freyr, a struggling Norwegian startup hoping to become a global battery powerhouse using a highly automated cell production system, got shareholder approval to become a U.S. company by the end of 2023, which will help it seek federal incentives for clean energy projects.

Where is Freyr based?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in the United States and Vaasa, Finland. FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030.

When will Freyr battery start production?

Construction is sanctioned with production starting in 1H-2024. The project includes eight production lines and a battery testing center. FREYR aims to reach over 200 GWh annual production capacity by 2030. FREYR Battery has approved the construction of its first gigafactory, Giga Arctic, in Mo i Rana, Norway.

When will Freyr charge its first battery unit cells?

FREYR has assembled and successfully charged its first battery unit cells at the company's Customer Qualification Plant ("CQP") and is on schedule to ramp process automation, production, and testing of chargeable cells in H2 2023 and beyond.

How many GWh will Freyr battery produce a year?

FREYR aims to reach over 200 GWh annual production capacity by 2030. FREYR Battery has approved the construction of its first gigafactory, Giga Arctic, in Mo i Rana, Norway. The facility will have an annual nameplate capacity of 29 GWh, supported by \$1.6 billion in identified debt financing.

FREYR Battery, Inc. is a developer of clean, battery cell production capacity. The Company seeks to serve its primary markets of energy storage systems (ESS) and commercial mobility, including marine applications and commercial vehicles. Its facilities are located at Mo i Rana industrial complex in Northern Norway.

FREYR Battery is ramping up production at the Customer Qualification Plant (CQP) in Mo i Rana, Norway, taking the U.S. technology from 24M Technologies to GWh scale. Back in November 2020, FREYR selected 24M as technology partner for lithium-ion cell manufacturing with their SemiSolid TM platform.

FREYR (NYSE: FREY) is a clean energy solutions provider building an integrated U.S. supply-chain for solar and batteries. In November 2024, FREYR announced a transformative transaction, positioning the Company as to be one of the leading solar manufacturing companies in the U.S., with a complementary solar and battery storage strategy.

FREYR (NYSE: FREY) is a clean energy solutions provider building an integrated U.S. supply-chain for solar and batteries. In November 2024, FREYR announced a transformative transaction, positioning the Company to be one of the leading ...

FREYR has claimed its planned network of factories will produce some of the cleanest and most sustainable lithium-ion batteries on the market, targeting annual production capacity of 50GWh by 2024 and 200GWh ...
