A very concise explanation of how solar panels work is this : Solar panels absorb energy from the sun, creating direct current (DC) electricity. This electricity is fed into what is called a solar inverter, which in turn, converts the current into alternating current (AC) electricity which is then used to power electrical appliances.

Together, solar panels and inverters make up a complete solar power system that can generate clean, renewable energy for your home or business. Solar Power & Battery Backup Solutions Durban Solar panels and battery backups are an effective solution for homeowners and businesses that want to generate their own electricity and reduce their ...

KZN Solar has been operating in the Kwa Zulu Natal area since 2007. We have completed over 3000 Solar Geyser and Heat Pump installations, and around 8000 low pressure Solar Geyser installations. ...
