

Republica Moldova, împreună cu alte țări ale lumii, prin implementarea unor politici de sprijin a producției de energie din sursele inepuizabile tind să participe la reducerea emisiilor de gaze și rezultatul este diminuarea efectului de seră.

Moldova has proposed an ambitious strategy to increase energy production from renewable sources. The state will provide potential investors with tools and facilities to attract them to invest in green energy production in Moldova's growing market.

Our team of engineers is dedicated to creating a detailed and customised plan that considers various aspects, including the system size, type and location of solar panels, energy storage systems (if applicable), and electrical interconnections.

Moldova aims to fully integrate as much green energy as possible in the coming years, targeting the diversification of its energy sources by attracting foreign investors seeking business opportunities in the country.

Chisinau, 9 December /MOLDPRES/ - Simtel Solar, part of the Simtel (BVB: SMTL) engineering and technology group, leader in the renewable energy field, extends its portfolio through the launch of a new business line dedicated to the system of storing energy, providing full consultancy solutions EPC (Engineering, Procurement and Construction), ...
