

Who is IDD energy consultancy?

IDD Energy consultancy Limited is a leading provider of comprehensive energy management solutions for major enterprises, helping them save expenses and consumption. a selection of our

What services do we provide to Mongolian energy sector?

We provide consulting services, training courses, the supply of products, engineering design and support to the Energy sector in Mongolia. Our experts combine long-term research, management and consulting experience in the Mongolian energy sector project.

What services does IDD energy offer?

IDD Energy provides a comprehensive range of energy management services, giving businesses an insight into their energy usage and future consumption reduction strategies.

What is the difference between G&D and IDD?

The generated chilled water can be used for your cooling processes. G&D only consumes as much electricity as a lightbulb. It is totally environmentally friendly without any CO<sub>2</sub> emissions. IDD models battery cells electrochemically and determines where the heating occurs in the battery pack through detailed analysis.

IDD is an expert on digital twin that can predict the temperature of the batteries in advance, rather than using the current through the BMS, and adjust the battery's current according to the battery temperature. IDD's algorithm knows in advance when the battery will heat up and adjusts the flow of refrigerant accordingly.

The consulting industry of Mongolia is home to dozens, if not hundreds, of consulting firms that support clients in the Energy industry. Energy consulting firms advise and support organisations in Energy with all aspects of their business, including strategy, business model, innovation, operations, processes, systems and solutions, and people.

The International Energy Agency (IEA) estimates that renewable energy will need to account for at least 65% of global electricity generation by 2030. As well as this, the Paris Agreement dictates that zero-carbon solutions could be competitive in sectors representing more than 70% of global emissions no later than 2030. With this in mind, we showcase some of the ...
