

What is the best generator for backup power?

The ultimate generator for backup power is a whole-home generator. They're expensive, but if you can afford one, they're highly convenient. My favorite is the Generac Guardian series. The line has a wide range of power levels, they all come with wi-fi connectivity, and they're well-designed for permanent outdoor installation.

Are portable generators a good backup power option?

Portable generators are popular emergency backup power options thanks to their lower cost, the portability to use them for other activities, and the ability to store them out of the way. The downside is that most portable models can't power your whole house, so you have to pick and choose what to keep running and what to do without.

Does Generac have a home standby generator?

Generac's 26kW home standby generator can start all of your home's large appliances, ensuring your home remains a sanctuary for you and your family. Try again! Try again! Try again! Try again! Try again!

How much power do you need for a home backup generator?

You will likely need at minimum a 10,000 Watt or 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.

How do I protect my generator from carbon monoxide?

Use a fuel stabilizer when you're storing gasoline for an extended period of time, as destabilized gas can be a fire hazard. Operate your generator at least 20 feet away from your home to keep any carbon monoxide from making its way into your home. Install a transfer switch on your generator transfer between grid power and generator power.

How much does a home Generator cost?

Typically, home generators cost anywhere from around \$500 for small models that can power a few appliances to over \$1,500 for larger devices that can re-power your entire home. To help you select the best home generator for your needs, the This Old House Reviews Team put together this guide of the top home generators on the market.

Whole house or home backup generators start at ~\$3,000 for a 10kW model and go up to around \$30,000 for a 150kW model. Most residential homes will need a 10-20kW generator. A popular 16,000 or 16kW whole house generator from Generac will put you back about \$4,200 (plus installation, which will cost several thousand dollars at a minimum).

For thunderstorms, hurricanes, and other emergencies, a generator provides a home backup for power outages. However, purchasing a portable generator comes with a big price tag. High-end portable generators can cost between \$800-\$1,500, while smaller models can still set you back several hundred.
