

Does Emerson own network power?

In August 2016, Emerson announced the sale of the Network Power business to Platinum Equity and a group of co-investors. Headquartered in Columbus, Ohio, the company is a leading provider of thermal management, A/C and D/C power, transfer switches, services and information management systems for the data center and telecommunications industries.

What makes Vertiv different from Emerson Network Power?

Vertiv will build on the broad portfolio of product and service offerings for power, thermal and IT management capabilities it previously offered as Emerson Network Power, including its industry-leading flagship brands ASCO®, Chloride®, Liebert®, NetSure(TM) and Trellis (TM).

What are Emerson/Vertiv network power rectifiers?

Emerson/Vertiv Network Power rectifiers - the heart of the power system - possess some of the highest power densities and smallest footprints in the business. These power solutions can be further enhanced with the addition of intelligent controllers, remote system monitors, battery management units and a full range of distribution modules.

Where is Emerson based?

The company, which is headquartered in Columbus, Ohio (USA), has more than 20,000 employees and more than 25 manufacturing and assembly facilities worldwide. Platinum Equity acquired the business today from Emerson in a transaction valued in excess of \$4 billion. Emerson also retained a minority interest in the company.
