

The solar project is part of the new national energy policy released last year, titled "The Power to Change - Montserrat Energy Policy 2016 - 2030 (MEP 2016-2030)." The tender represents the first phase of two solar project phases. The first phase will account for 250 kilowatts (kW) of solar capacity.

Montserrat inaugurated a major solar PV project, with the Premier saying the island would continue to develop both solar PV and geothermal energy projects. The 250KW solar PV plant has entered into commission, and will deliver 10% of Montserrat's load demand.

The Engineering, Procurement and Construction (EPC) Contractor, SALT Energy, employed local subcontractors to install and wire an 824-solar panel PV system across five slopes of three buildings. The integration of this new power source means the citizens of Montserrat can expect greater savings on their electricity bills, greater fuel savings ...

The solar photovoltaic (PV) project is the first phase of two planned renewable energy projects to reduce the dependence on fossil fuel for power generation on Montserrat. The rooftop solar project will provide 10% of the grid's peak daytime demand.

On Monday October 1, the Government of Montserrat, through the Ministry of Communications, Works, Labour and Energy awarded Florida-based Company "Salt Energy" an EC \$1.89 million dollar contract for the installation of ...

The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019. The units were installed on three buildings; MCW workshop, the Brades power Station and the Factory Shell Buildings commonly referred to as the Montobacco building.
