

Will China build Namibia's largest solar power plant?

Namibia's state-owned power utility NamPower on Monday said it had signed a contract with two Chinese firms to start building the country's largest solar power plant.

How much electricity does Namibia generate per kWp?

Due to the constantly high irradiation, PV systems in Namibia generate twice as much electricity as comparable systems in Germany on an annual average. A daily yield of up to >5.6 kWh can be expected per kWp of installed PV capacity. In comparison, natural conditions for wind power are limited in the region.

How much solar energy does Namibia generate a year?

With approx. 300 sunny days and over 3,000 sun hours per year, the annual solar irradiation reaches values of 2,200 to 2,400 kWh/m². Due to the constantly high irradiation, PV systems in Namibia generate twice as much electricity as comparable systems in Germany on an annual average.

Can Namibia's solar PV capacity be expanded?

HopSol spoke with ECP about how Namibia's solar PV capacity can be expanded and further integrated with the national grid.

Why did Namibia only auction solar PV capacity?

Technology choice: specific vs. neutral Namibia chose to only auction solar PV capacity based on the technology's relative simplicity, the country's excellent solar resources and the utility's desire to understand the technology better.

Who owns the electricity market in Namibia?

Traditionally, the Namibian electricity market has been dominated by the state-owned utility Namibia Power Corporation (Pty) Ltd., or NamPower for short. In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer.

Summary Location Overview Background Construction Other considerations See also External links Distinguish from the 5 Megawatts Rosh Pinah Solar Power Plant majority owned by Old Mutual Namibia. NamPower Solar Power Station (NSPS), also referred to as NamPower Rosh Pinah Solar Power Station, is a planned 100 megawatts solar power station in Namibia. The power station is under development by Namibia Power Corporation Limited

Where do you see the most growth opportunities in Namibia over the next five years? We see a lot of development and growth in the renewable energy space fuelled by an abundance in solar and wind energy ...
