

Ultimately, the project will cover nearly two-thirds of the site's electricity needs and will help avoid close to 230,000 tons of CO2 emissions. This project strengthens Prony Resources New Caledonia's ambition of achieving carbon neutrality by 2040.

Akuo plans to deploy 200 MWh of battery storage in New Caledonia, supplying 50 MW for three hours per day over 12 years. The facility will primarily support the operation of nickel mines.

The French overseas territory of New Caledonia has hailed the switch-on of a 16MWp solar farm, with battery energy storage to be later attached, and another standalone 5MWh battery project,...

French oil and gas major Total has this week inaugurated the H&#233;lio Boulouparis 2 solar project in New Caledonia, the largest solar power plant in any French overseas territory.

Ultimately, the project will cover nearly two-thirds of the site's electricity needs and will help avoid close to 230,000 tons of CO2 emissions. This project strengthens Prony ...

TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources New Caledonia while meeting demanding local, industrial, environmental and social requirements.

The government of New Caledonia, a French overseas territory in Polynesia, has given the green light to the construction of a 50-MW/150-MWh battery energy storage system (BESS) by domestic renewable power producer and developer Akuo.

A participant in the global energy transition, Prony Resources sustainably contributes to New Caledonia's development by processing its nickel and cobalt resources in accordance with the highest industrial and environmental standards.

France's largest battery storage facility. This plant will be the island's first major energy storage facility, but also France's largest in terms of capacity. The municipality of Boulouparis will host the new plant.
