

# New OTC PV Performance Forecast Announced

What is a snapshot of global PV markets?

This 12th edition of the "Snapshot of Global PV Markets" aims at providing preliminary information on how the PV market developed in 2023. The 29th edition of the PVPS complete "Trends in Photovoltaic Applications" report will be published in Q4 2024.

Why did PV module prices fall in 2022?

After several years of tension on material and transport costs, module prices plummeted in a massively over-supplied market, maintaining the competitiveness of PV even as electricity prices decreased after historical peaks in 2022. Major trends include:

What is the global PV market?

The U.S. was the second-largest market in terms of cumulative and annual installations. Analysts project that cumulative global PV installations will reach 2 TWdc - 5 TWdc by 2030 and 4 TWdc - 15 TWdc by 2050. In 2023, PV represented approximately 54% of new U.S. electric generation capacity, compared to 6% in 2010.

What will IEA PVPS look like in the future?

In the coming years, IEA PVPS will follow the dynamic evolution of decommissioning, repowering and recycling closely, with the expected impact on the installed capacity, market projections for repowering and the decline in PV performances due to aging PV systems. Data Model and Data Acquisition for 2.4 AC or DC Numbers?

How much does a PV system cost?

The median price for residential PV systems reported by EnergySage increased 6.3% y/y to \$2.8/Wdc--in-line with mid-2020 price levels. Global polysilicon spot prices fell 22% from mid-January (\$8.70/kg) to late April (\$6.76/kg), approaching the lowest nominal price seen over the past decade.

Will there be an exception on PV manufacturing equipment?

Announcement indicated that there would be an exception on PV manufacturing equipment. Domestic Content Bonus: The IRS just released updated guidance intended to make it easier to use the Domestic Content Bonus within the ITC and PTC tax credits for electric generating assets.
