

Can you install off grid solar in New Zealand?

In New Zealand you can install your own off grid solar up until the point of 240V AC wiring- such as wiring into a household switchboard - which by law can only be done by an electrician. We make installation easy with off grid solar kits in various sizes to fit your lifestyle. Not sure which off grid solar power system is best for your lifestyle?

Why does New Zealand have a small off-grid Solar System?

It's because different areas around New Zealand have varying official sunshine hours according to NIWA. You can read more in our latest article "Off Grid Solar For Dummies". The PS: Tiny off grid system only comes with six solar panels (2.28 kW total). This will not be sufficient for many locations around Aotearoa.
