

Are solar inverters a good choice for New Zealand homes?

Solar energy is a popular and cost-effective option for New Zealand homes and businesses looking to reduce their carbon footprint and save on energy costs. However, to get the most out of a solar system, it's crucial to invest in high-quality components, including reliable solar inverters.

What are solar inverters?

Solar inverters are commonly referred to as the brains of a solar system. While panels may be what everyone immediately thinks of when solar is brought up, inverters are what make the magic happen. In order to get a better understanding on inverters in NZ from a beginners point of view, check out the first episode in our new podcast, Solar in NZ.

Who are Sungrow solar inverters?

A global inverter and storage manufacturer with a complete range of products for solar and storage projects in Australia and New Zealand. Sungrow make a complete range of solar inverters and energy storage products for residential, commercial, industrial and utility grade solar projects.

Which solar inverter is best for residential installations?

For residential installations, the GoodWe hybrid solar inverter is a popular choice. GoodWe is a world-leading PV inverter brand that offers comprehensive monitoring, providing users with real-time data on solar performance.

What types of solar inverters are available in Aotearoa?

Victron inverters are also super versatile, allowing you to connect solar batteries, generators, and even other forms of renewable power generation, such as wind turbines and micro-hydro solutions. Now, hybrid inverters are fast becoming the most popular type of solar inverter available in Aotearoa.

What types of inverters are available?

Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power. When there is solar energy to use, the system will deliver it and when there is insufficient energy to deliver, the system will switch back to grid power.

Since inverters are vital to you getting the best out of your solar system, make sure you're getting the right one for your home. Our recommendations are GoodWe for grid-tied systems, Victron for off-grid and AlphaESS for hybrid.

A solar inverter is at the heart of a solar system. The solar inverter works hard to convert DC electricity from solar panels into AC electricity that we can use in our homes. The better quality an inverter is the longer it will last. If you buy a low-quality inverter, you will usually buy twice.

Take control of your energy consumption and invest in a solar inverter that aligns with your specific needs. At ZEN, we can guide you through the process of finding the top solar inverters of 2023 and help you make a decision that will power ...

You can increase the proportion of self-use energy generated by your solar system, from 20% to more than 80%! Our hybrid (or back-up power) inverters are reliable, quick to install, adaptable and scale-able - providing the right solution for powering remote or city residences, farms, rural workshops or off-grid communities.

By choosing brands like SMA and GoodWe, users can benefit from top-of-the-line technology, comprehensive monitoring systems, and exceptional reliability. With the right solar inverter, solar energy can be a sustainable and cost-effective ...

Fronius inverters are efficient and reliable and form the indispensable heart of every photovoltaic system. Power categories ranging from 1.5 to 27.0 kW guarantee suitability for virtually any system size - from a family home to a large-scale system. [Download Fronius Inverter Range PDF](#)

Take control of your energy consumption and invest in a solar inverter that aligns with your specific needs. At ZEN, we can guide you through the process of finding the top solar inverters of 2023 and help you make a decision that will power your home efficiently and ...
