48V LiFePO<sub>4</sub> Battery BMS The BMS is manufactured by high quality Mos and IC. Keep your battery long cycle service life time. Extreme low power consumption. The consumption of the whole device is less than 50uA. Multiple protection Over-charging protection. Over-discharging protection. Over-current protection. Temperature protection.

The high-voltage power board (HVP) is the core component in the household storage stack-high-voltage box, which integrates fuses, shunts, pre-charging, high-voltage acquisition circuits, DCDC, CAN communication, and daisy chain transfer functions.

BMS settings are extremely high especially for some 15S / 48V packs. Here some much more conservative settings I'm using for the same kind of config. 54V float is also kind of high (3.6V / cell) but indeed what Narada recommends. You're losing very little capacity by charging only @ 51.4V ...

The high-voltage power board (HVP) is the core component in the household storage stack-high-voltage box, which integrates fuses, shunts, pre-charging, high-voltage acquisition circuits, DCDC, CAN communication, and daisy chain ...

It is specialized in energy storage lithium battery management system BMS and energy storage overall solution, 5G power supply system, new energy vehicle electric (BMS, DCDC) and intelligent control module, power/ A national high-tech enterprise integrating research and development, production, sales and service of lithium battery control ...

Shenzhen Tian-Power Technology Co., Ltd. Founded in 2007, the company is specialized in energy storage lithium battery management system BMS and energy storage overall solutions, 5G power supply systems, new energy vehicle electric (BMS, DCDC) and intelligent control modules, lithium batteries for power/consumer products A national high-tech ...

Tian-Power Technology was established in 2007. It is specialized in BMS and energy storage overall solution, 5G power supply system, new energy vehicle electric (BMS, DCDC) and intelligent control module.
