

The government of Niger is launching the selection process for an independent power producer (IPP) to build a solar photovoltaic plant near the capital Niamey. The solar plant is being built under the World Bank Group's ...

Niamey, Niger, June 14, 2021 - IFC and the Government of Niger today announced a partnership under the World Bank Group's Scaling Solar program to develop up to 50 megawatts of grid ...

Niamey, Niger, June 14, 2021 - IFC and the Government of Niger today announced a partnership under the World Bank Group's Scaling Solar program to develop up to 50 megawatts of grid-connected solar power, equivalent to roughly 20 percent of ...

This project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy.

Still suffering from the effects of the 2021-2022 Global Energy Crisis; however, Niger has one of the lowest rates of access to electricity in the world, as only 19.2% of the population has access to electricity, giving energy in Niger a small reputation.

The Global Electrification Platform (GEP) is a multi-phase project led by the World Bank to standardize and simplify the use of geospatial tools for least-cost electrification planning. The GEP provides a high-level overview of the technology mix (grid and off-grid) required to achieve universal access by 2030.

Niger's mega solar power plant is now operational, mitigating Niger's 70% power loss. Despite coup-related delays, the solar plant significantly improves power supply in Niger's capital...
