

What is changing in Nigeria's solar outlook?

The new reality has prompted dramatic changes in Nigeria's solar outlook by putting the cost of electricity from sunlight on par with unsubsidized gasoline.

How much power does Nigeria have?

Nigeria has an installed capacity of 14,300MW of power, but the grid can carry only about half of that. Then only half of that residual amount gets to customers because of a litany of issues including aged infrastructure and vandalism. "The big market isn't working here, so the plan is to start small and then expand," Oduro says.

Is Nigeria's new president Bola Tinubu ready for a prototype?

The company raced to get the prototype ready as quickly as possible after Nigeria's approach to energy suddenly changed. Bola Tinubu, the country's new president, stood at a podium in May, dressed in his white agbada robe and a cap embroidered in green-and-white national colors, and veered far off script.

Why do Nigerians call generators 'I-pass-My-Neighbor'?

And at the bottom of the generator hierarchy, found in countless shops and homes, are legions of less capable machines known in Nigerian Pidgin as "I-pass-my-neighbor generators." The derisive name mocks those who can't afford even a generator that puts out just enough juice to run fans, turn on lights and charge phones.

Why did SunFi host Solar vendors in Ikoyi a month after subsidy removal?

A month after the subsidy removal, SunFi hosted solar vendors in its offices on a quiet street in Ikoyi, an affluent neighborhood whose towering trees have been felled to build luxury high-rises, broaden roads and create drainage as Lagos grows.
