

Are solar-powered outdoor lights a good idea?

Using solar-powered outdoor lights can set that glowing backyard ambiance in a more sustainable way, and eliminates the need for long, ugly cords or constant battery replacement. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

Do outdoor solar lights work at night?

No matter which type you choose, these versatile lights take in sunlight during the day to illuminate your yard at night. We tested 27 outdoor solar lights in our Des Moines lab and at home, evaluating them on setup, features, design, brightness, durability, and value.

Are solar lights a good option for outdoor space?

One great way to illuminate your outdoor space is with solar lights. "Solar lights, compared to low voltage and line voltage outdoor lights, are safer and more DIY-friendly since there's little to no wiring required at all," says Sarah Jameson, marketing director of Green Building Elements.

Are solar-powered outdoor lights waterproof?

Almost all solar-powered outdoor lights are LEDs, with either integrated or replaceable bulbs. Because they are designed for outdoor use, most solar-powered lights offer decent water and weather resistance. The level of resistance varies from light to light; pay close attention to each model's weather resistance rating.

Do solar lights work if you don't have sunlight?

In our tests, solar lights were able to generate light even after charging on overcast days, but a lack of sun certainly affected battery life. If you're concerned about a lack of sunlight, look for outdoor lights that you can charge with a USB cord, so you can top off the battery even on the dreariest days.

Do solar lights need electricity?

Solar lights require no outlets or electricity, so you can rely on something as routine as the sunrise to brighten your yard. "When shopping for your mounted solar lights, make sure to consider placement and purpose of the lights," says Sheva Knopfler, co-founder and creative director of Lights.com. "How bright do you need the space illuminated?"
