

What is Hazelwood?

Jointly developed by ENGIE and Eku Energy, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia, representing a key moment in repurposing thermal assets for renewable energy technologies.

What is Hazelwood Bess?

Jointly funded and developed by ENGIE and Eku Energy, the 150 MW/150 MWh Hazelwood BESS is Australia's largest privately funded utility-scale battery.

Is Hazelwood a new era in Australia's energy transition?

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable energy technologies.

What is a Hazelwood battery?

"The Hazelwood battery will be the product of Fluence's latest generation technology, supported by our rapidly growing team in Victoria and the most widely adopted automated trading platform available in Australia today," Fluence Australia general manager Aaron McCann said.

Why should you invest in Hazelwood?

Close to transmission and available space at site, Hazelwood is the perfect location for an asset that can grow in depth and duration, increasing the hosting capacity for renewables." Daniel Burrows, Chief Investment Officer and Head of Asia Pacific, Eku Energy said, "The Hazelwood battery is an example of how strong partnerships can support

On June 14, ENGIE's world-largest Battery Energy Storage System (BESS) was commissioned at Hazelwood, which is in the state of Victoria, South East Australia. The new facility will significantly contribute to ENGIE's goal of reaching a combined output of 10GW for all existing ENGIE battery facilities by 2030.

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable energy technologies. The 150 MW/150 MWh BESS has been jointly funded and developed by ENGIE and Eku Energy.

French energy company Engie and its project partners Eku Energy and Fluence have commissioned the 150MW/150MWh Hazelwood battery energy storage system (BESS) at the former site of Hazelwood power ...

The Hazelwood BESS is Australia's first battery storage system to be hosted at a retired coal-fired power

station and represents a key moment in repurposing former thermal assets for renewable energy technologies.

French energy company Engie and its project partners Eku Energy and Fluence have commissioned the 150MW/150MWh Hazelwood battery energy storage system (BESS) at the former site of Hazelwood power station in the Latrobe Valley in Victoria, Australia.

Project partners Fluence, ENGIE and Macquarie's Green Investment Group announced today the Hazelwood Battery Energy Storage System (BESS), will benefit from the now-unused 1,600MW of transmission network capacity at the former Hazelwood Power Station site in Victoria's LaTrobe Valley.

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable energy technologies. The Hazelwood BESS was officially opened on 14 June 2023 by The Hon. Lily D'Ambrosio MP,

On June 14, ENGIE's world-largest Battery Energy Storage System (BESS) was commissioned at Hazelwood, which is in the state of Victoria, South East Australia. The new facility will significantly contribute to ...

A large-scale battery energy storage system (BESS) has been brought online at the site of the former Hazelwood Power Station coal plant in Victoria, Australia. Marking what looks to be the first of many coal-to-clean energy transformations in the country, the commissioning of Hazelwood BESS was announced yesterday by project partners ENGIE, Eku ...

The Hazelwood Battery Energy Storage System (HBESS) is a 150MW/150MWh utility-scale battery that delivers further electricity grid stability for Victoria. It has the capacity to store the energy equivalent of an hour of energy generation ...

A large-scale battery energy storage system (BESS) has been brought online at the site of the former Hazelwood Power Station coal plant in Victoria, Australia. Marking what looks to be the first of many coal-to-clean ...

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable ...

The Hazelwood Battery Energy Storage System (HBESS) is a 150MW/150MWh utility-scale battery that delivers further electricity grid stability for Victoria. It has the capacity to store the energy equivalent of an hour of energy generation from the rooftop solar systems of 30,000 Victorian homes, playing a critical role in increasing the state ...

Engie announced on Wednesday that construction of the Hazelwood Battery Energy Storage System (BESS)

has commenced and network connection agreements are already in place, with the battery scheduled to be ...

Engie announced on Wednesday that construction of the Hazelwood Battery Energy Storage System (BESS) has commenced and network connection agreements are already in place, with the battery scheduled to be operational by November 2022.

Jointly funded and developed by ENGIE and Eku Energy, the 150 MW/150 MWh Hazelwood BESS is Australia's largest privately funded utility-scale battery. Fluence supplies, operates, and maintains the facility for the ...
