## **SOLAR** PRO. Norfolk Island solar harare

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

How many solar panels are there in Norfolk Island?

44 km of high and 44 km of low voltage cabling. Distributed household rooftop PV systems. There have been more than 555small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849.

How much solar irradiation does Norfolk Island experience?

Norfolk Island experiences solar irradiation levels reaching approximately 4.81 kilowatt-hours per square metre per dayon average over a year. The following graph shows solar irradiation/output levels per kilowatt of installed solar panels in the 2899 area per month.

How much energy does Norfolk Island generate a year?

Based on a conservative average of 7,139 kWh of energy production a day (enough to power the equivalent of 446 homes) and retail electricity costs of 0c per kilowatt-hour; Norfolk Island and 2899 postcode area residents are collectively generating \$00f energy at retail prices a year!

Will Australian government help Norfolk Island's diesel-based electricity cost woes?

The Australian Federal Government has stepped in to give the folks on Norfolk Island some relieffrom their diesel-based electricity generation cost woes. Norfolk Island is a tiny island (3,455 hectares) in the South Pacific Ocean.

What angle should a rooftop solar panel be installed in Norfolk Island?

Rooftop solar panels installed in Norfolk Island, should generally face Northfor the best results. For a good panel angle, the general rule of thumb is it should be around the same as latitude.

The programme called for the funding of commercial-sized solar and battery solutions, the subsidisation of residential solar and battery solutions, the rollout of time of use electricity meters and the implementation of a new billing system that allows for dynamic pricing.

Norfolk Island"s power goes 100% renewable (solar) at the end of this year. The Bounty Museum got switched over today so that we now can do our bit and feedback into the grid (the islands battery) so as to help lower the price of electricity for everyone living on the island.
