

What is the energy supply in North Macedonia?

ENERGY PROFILE North Macedonia ENERGY PROFILE Total Energy Supply (TES) 2016 2021
Non-renewable (TJ) 93 548 92 443 Renewable (TJ) 19 952 22 166 Total (TJ) 113 500 114 609 Renewable
share (%) 18 19 Growth in TES 2016-21 2020-21 Non-renewable (%) -1.2 -3.0 Renewable (%) +11.1 -0.5
Total (%) +1.0 -2.5 Primary energy trade 2016 2021

What is the solar power potential of North Macedonia?

Solar power potential The solar potential of North Macedonia is clearly the most prominent clean energy resource in the country.

Are wind power projects a good opportunity for North Macedonia?

Nevertheless, for the time being, there is no visible resistance and wind potential remains. Just as with any future exploitation of renewable energy, wind power projects can be a good opportunity for citizen participation and creation of energy communities in North Macedonia.

Who is promoting solar energy in North Macedonia?

Aside from the incentives promoted by the government, one of the emerging and potentially important stakeholders in promoting and expanding the usage of solar energy in North Macedonia is the "Solar Macedonia" Association.

What is North Macedonia's energy mix?

In addition, North Macedonia's energy mix includes a significant percentage of hydropower, having mountainous geography with powerful streams of rivers running through the country. For the time being, the hydropower capacity is partially used.

Will Macedonia build a solar power plant on Oslomej?

In line with its new energy strategy, the Macedonian government opened a tender, earlier in 2020, to find investors for constructing two solar power plants on the site of Oslomej, with a combined capacity of up to 100MW, in a partnership with ESM, the state power utility.

North Macedonia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The results of the study are unambiguous: North Macedonia has an enormous untapped potential for renewable energy development. Even when completely excluding all important bird and plant areas, the potential comes to ...

North Macedonia adopted its first National Energy and Climate Plan (NECP) in June 2022. It follows the more progressive scenarios from the Energy Strategy in its coal phase-out timeline, with Oslomej being decommissioned in 2021 and ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

North Macedonia welcomes investments in the energy sector. The government invites companies to design, build, and operate new large and small hydro power plants, wind, solar, and biogas farms. Companies can also apply for tenders to construct sections of the national gas distribution network.

The EU will continue to be a strong partner in providing assistance for the implementation of renewable energy projects with the goals of promoting economic growth, environmental protection and ultimately bringing the Republic of North Macedonia closer to the European Union."

North Macedonia adopted its first National Energy and Climate Plan (NECP) in June 2022. It follows the more progressive scenarios from the Energy Strategy in its coal phase-out timeline, with Oslomej being decommissioned in 2021 and Bitola in 2027.

Increasing the share of the energy from renewable energy sources (RES) in the total energy consumption is one of the major strategic objectives of the Government of the Republic of North Macedonia. This is very important for ensuring stable energy supply and energy security, thus creating conditions for

Parallel to the transformation of the energy infrastructural capacities, North Macedonia will have to invest in opening up new green jobs that would neutralise the shock from the eventual...
