

It will set up a large off-grid solar system - the hub - at Takataka in East Are"are, Malaita. This will provide mains-quality power to run income generating assets that boost the community"s climate resilience.

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can ...

The Australian Government has today announced three new business partnerships to support small-scale, off-grid renewable energy in remote and rural areas in Solomon Islands as well as another six across the Pacific ...

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems.

The Australian Government has today announced three new business partnerships to support small-scale, off-grid renewable energy in remote and rural areas in Solomon Islands as well as another six across the Pacific and Timor-Leste.

SEANZ 2018 Award - Best Solar PV Grid Connected Implementation ; SEANZ 2018 Award - Best Solar PV & Storage Grid Connected Implementation ; SBN 2017 Award - Judges Commendation - Revolutionising Energy; SEANZ 2017 Award - Best Solar PV & Storage Off-Grid Implementation; SEANZ 2016 Award - Best Solar PV & Battery Grid Connected Implementation

That project will establish a large off-grid solar system known as the Hub at Takataka in East Are""s Malaita, which will provide mains quality power to run income-generating assets that boost the community"s climate resilience.

Solomon Power charges a maximum demand for the connection of solar arrays to the grid. This is to ensure that there is adequate capacity reserved in the grid for providing backup supply for you in the event of bad weather or other similar situation when your solar system

Raython R8 are all-in-one standalone solar power system. They are tailored solutions to address the energy challenges faced by family homes and small businesses lacking access to grid power, formerly reliant on generators.

Families in Solomon Islands" Guadalcanal Province can now access a more resilient healthcare system

powered by 24/7 solar energy, thanks to a partnership between Superfly Limited, the Good Samaritan Hospital and the Australian Government.
