

How much does a 1.5kw solar system cost?

Now that we've established the potential savings and benefits of a 1.5kW solar system, let's delve into the cost aspect. The typical price for a 1.5kW solar system is around \$3,000. It's important to note that prices have significantly decreased over the past decade, making solar energy much more accessible and affordable for homeowners.

How much does a kW solar system cost?

To cut a long story short, you can now get a subsidy of approximately \$350 for every kW installed. How many solar panels make up a 1.5kW system? To make up a 1.5kW solar system you needed 6 solar panels, assuming that you use 250W panels, but 415W modules are commonly used these days. 250W panels have pretty much gone the way of 1.5kW systems.

How much electricity does a 1.5kw solar system use?

These days, because panels are both larger and more efficient, a 1.5kW solar system only requires 3 or 4: How much electricity will a 1.5kW solar system generate? A 1.5kW solar system will generate approximately 6kWh per day. This is enough to run a third of an average aussie household.

Do I need a 1.5kw solar system?

Whether or not you need a 1.5kW solar system will depend on many things. If you are a Residential customer and you use between 4.1kWhs and 9kWhs then a 1.5kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 1.5kW solar system quotes.

Is a 1.5kw solar system a good value?

Due to a scheme called the "solar multiplier" you used to get twice the rebate for the first 1.5kW of any system, compared to subsequent kW's. So in terms of dollars per kW, a 1.5kW system represented the best value. However, all that has now changed. The "solar multiplier" which favoured 1.5kW solar systems is gone. But don't panic!

How much money can a 1.5kw solar system save?

With a 1.5kW solar system, you can save up to \$465 per year. Over the 25-year lifespan of the solar panels, this translates to a savings of \$11,634. These savings are based on the assumption that you will utilize the self-generated solar energy and reduce your reliance on grid electricity.

To give you a rough guide, a 1.5 Kw solar system costs in the region of \$2,000, compared to a 5Kw system that will cost nearer \$4,000. However, there are always competitive deals to be had and solar system prices will vary according to requirements.

Solar Proof Quotes offer a quick and easy way to get 1.5kW solar system quotes. Just fill out our quick and

easy form to get quotes from great installers in your region who are experienced in 1.5kW solar power installations.
