

Who is erthos solar?

Erthos, Arizona-based creator of Earth Mount Solar PV, has announced 14MW of contracted projects and a MOU for a 107MW single project.

How does erthos solar work?

Erthos' technology mounts solar modules directly on the ground without steel supports or trackers. Image: Erthos. Erthos, an Arizona-based energy technology company and creator of Earth Mount Solar PV, has announced 14MW of contracted projects and a memorandum of understanding (MOU) for a 107MW single project.

How does erthos build a solar plant?

Erthos' method of building solar plants does away entirely with trackers, racking and structural steel. Instead, it installs the photovoltaic solar modules directly on the ground. Canary Media covered the startup when it unstealthed last year.

Why should you choose erthos for your solar project?

Erthos offers a complete solar integration platform with all the capabilities necessary to bring your project to fruition. From instant project estimates to project engineering, technology provisioning, financing, construction, and long-term operations and maintenance, our platform integrates every step of development for an optimized experience.

How has erthos revolutionized solar deployment?

By eliminating structural steel and going directly to the earth, Erthos has revolutionized solar deployment. With physical simplicity comes ease of development. From initial design through permitting, financing, and construction, Erthos provides a seamless path to building a profitable, repeatable, portfolio. Sign up to receive customized details.

What does erthos do?

Erthos provides a development platform, acts as the solar architect for the developer and project engineer, and provides operations and maintenance services. The company partners with Directional Services, an installer of utility-scale solar, and has licensing agreements with solar module manufacturers ET Solar, ZNShine Solar and HT-SAAE.

After the Series A fund the company was able to finalise development of its Earth Mount Solar PV system architecture which installs solar modules directly on the earth and without using a steel...

Packaged in a system that offers the smallest footprint and lowest visual profile of any utility-scale solar architecture on the market, their beauty is the perfect compliment to their value. With the lowest CAPEX and

highest returns, Erthos projects deliver in every way.

Erthos offers the only solar deployment technology capable of providing bankable project characterization with a few basic inputs and the click of a button. Because our power plants are built by placing solar modules directly on the earth, developers can bypass the unknowns present at the early stages of typical plant development and get right ...

Erthos CEO Jim Tyler anticipated that these trends would make solar less competitive and came up with a solution: redefining utility-scale solar design with Earth Mount Solar PV. Earth Mount panels lay flat on the ground, eliminating ...

Following extensive due diligence, New Energy Risk confirmed the suitability of Earth Mount Solar technology and its qualification processes for performance insurance. This insurance program ...

Earth Mount Solar distills the complexity of solar power plants into a modular, repeatable design. By installing solar modules directly on the earth, we eliminate all the costs required to engineer, procure, and install structural steel.

Erthos, an Arizona-based energy technology company and creator of Earth Mount Solar PV, has announced 14MW of contracted projects and a memorandum of understanding (MOU) for a 107MW single...

Erthos, an energy technology company with uniquely designed utility-scale Earth Mount Solar PV, announced 14 MW of projects under contract and a Memorandum of Understanding (MOU) for a single 107 MWdc project.

Erthos offers a complete solar integration platform with all the capabilities necessary to bring your project to fruition. From instant project estimates to project engineering, technology provisioning, financing, construction, and long-term operations and maintenance, our platform integrates every step of development for an optimized experience.

Erthos CEO Jim Tyler anticipated that these trends would make solar less competitive and came up with a solution: redefining utility-scale solar design with Earth Mount Solar PV. Earth Mount panels lay flat on the ground, eliminating the need for steel piles, racking, and trackers and minimizing ground disturbance.

Erthos" method of building solar plants does away entirely with trackers, racking and structural steel. Instead, it installs the photovoltaic solar modules directly on the ground. Canary Media covered the startup when it unstealthed last year.

Erthos" method of building solar plants does away entirely with trackers, racking and structural steel. Instead, it installs the photovoltaic solar modules directly on the ground. Canary Media covered the startup when it ...

Following extensive due diligence, New Energy Risk confirmed the suitability of Earth Mount Solar technology and its qualification processes for performance insurance. This insurance program will backstop Erthos" warranties and break new ground by supporting an expanded scope relative to current market solar warranties.
