

Why choose Optima Energy Services?

Optima Energy Services can save you time and money with over 25 years' experience in the energy sector. The team has helped many clients identify and correct errors and overcharges on their energy bills, resulting in significant savings.

Why is Fiji's energy sector a long-term priority?

The resilient development and diversification of Fiji's energy sector is a long-term priority for the Fijian Government due in part to rising national energy demand, volatile oil prices, ageing energy infrastructure, and the intensifying impacts of climate change and disaster events on Fiji's infrastructure, environment, people, and economy.

What is Fiji's Energy Trilemma?

As is the case in most national contexts, the oversight of Fiji's energy sector is defined by the 'energy trilemma' which requires continual efforts to balance the challenges of energy security, energy sustainability, and energy access/equity.

How can Fiji improve national energy statistics?

Working in collaboration with the Fiji Bureau of Statistics, efforts will be made to improve the detail and relevance of national energy statistics to help influence and inform prioritisation, decision-making, planning, and resource mobilisation.

What is the energy situation in Fiji?

It is a small island developing state (SIDS) that is heavily dependent on imported fossil fuel for its energy needs. The paper attempts to determine the past and current energy situation in Fiji, challenges faced and strategies to overcome these challenges. In 2014, Fiji generated 859 GWh of grid electricity from 259.8 MW of power plants.

How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.
