

Outdoor advertising lights solar panels power generation

What are the advantages of solar lighting solutions for urban billboards?

The advantages of these new solar lighting solutions for urban billboards are many: - they considerably increase the value of the sites equipped with our Rise On solution; - the compactness of the lighting modules drastically reduces the LED lantern visual interference; - Rise On also has a unique resistance to strong thermal variations.

Why do you need solar Billboard lighting?

More common, however, are still the classic billboards. So this is where lighting is needed. Solar billboard lightning has some advantages compared to other lighting. It can be used everywhere, even where electricity is difficult to access. It costs nothing apart from the original purchase, because the sunlight produces the energy.

Why should you choose Sunna LED lights for advertising billboards?

The design of the solution dedicated to the lighting of advertising billboards is designed to eliminate the notion of vandalism. Besides, Sunna LED modules, equipped with specific high-efficiency optics, diffuse a uniform light.

What are the advantages of solar Billboard Lightning?

Solar billboard lightning has some advantages compared to other lighting. It can be used everywhere, even where electricity is difficult to access. It costs nothing apart from the original purchase, because the sunlight produces the energy. Even on dark days with bad weather the produced energy is usually sufficient and still free of charge.

What is a large advertising space?

This is the name given to the large advertising spaces that can be found on busy roads such as highways. Large as they are, they easily attract the attention of road users, whether they are car drivers, pedestrians or otherwise. One reason why their size has grown over time is that vehicles have become faster.
