

Who are Outlook Energy Solutions?

Outlook Energy Solutions Limited. All Rights Reserved. Company registered in England and Wales, No. 11211672 Everyone has the right to a warm home, that's why we offer energy efficient home upgrades. Explore home energy solutions from Outlook Energy Solutions.

Does France need a new energy policy?

France has helped guide international efforts to tackle climate change, but it needs to accelerate key parts of its energy transformation to meet its targets. The government is facing crucial decisions about its future energy mix, according to a new policy review by the International Energy Agency.

What does the IEA review say about France's energy policy?

The IEA review confirms the orientations France has adopted, based on three pillars: strengthening energy efficiency, developing renewable energies and maintaining a nuclear electricity base."

Speed up the development of flexibility solutions for electricity demand. Looking ahead to 2030: the power system, driver of the low-carbon pathway In order to decarbonise the economy, a number of sectors, such as transport, industry and construction, will gradually shift towards electricity (at the expense of fossil fuels).

The current rate of deployment of low-carbon energy technologies and energy efficiency solutions in France is not fast enough for the government to meet its energy and climate targets, calling for stronger policy efforts and increased investments, according to the IEA's 2021 Energy Policy Review of France.

World Energy Outlook 2024 Extended Dataset Includes more detailed information at regional and country-level for APS, STEPS across projected years (2030, 2035, 2040, 2045, 2050) as well as historical data (2010, 2022, 2023), ...

World Energy Outlook 2024 Extended Dataset Includes more detailed information at regional and country-level for APS, STEPS across projected years (2030, 2035, 2040, 2045, 2050) as well as historical data (2010, 2022, 2023), Advanced Economies aggregated figures for NZE, and WEO chapters figures, investments, fossil fuel prices, etc.
