

When did Pakistan International Container Terminal start operations at Karachi Port?

Pakistan International Container Terminal started operations at Karachi Port in 2002 under a build, operate and transfer contract with Karachi Port Trust. The contract covered the exclusive construction, development, operation and management of a common user terminal at Karachi Port for a period of 21 years from 2002 to 2023.

What is Karachi's first purpose-built container terminal?

It is the nation's first purpose-built container terminal, the first operator within Karachi's new deepwater port, and the first in the country's container port size rankings, with its capacity scaled to handle 3.2 million TEU annually upon completion. It is also one of South Asia's most advanced container terminals, running on

Are Pakistani container terminals congested?

On average, Pakistani container terminals tend to be congested, and efficiency tends to be low. Yet we routinely operate at 25 to 30 moves per hour and have no congestion to speak of. While this has earned us positive feedback from our customers, the greatest beneficiaries in the long run may be the Pakistani people.

What operating system does Hutchison Ports Pakistan use?

Hutchison Ports Pakistan uses nGen, our award-winning terminal operating system. nGen controls yard and quayside operations with the highest levels of efficiency. With UBI you're in control of appointments, container inquiries, terminal slips, shipping schedules, and everything else that's happening in and around the port.
