

What is the main source of energy in Palestine?

Indeed,electricityis the main source of energy in the Palestinian energy mix,and for this source,the residential sector is the main consumer. Other energy sources have their own leading consumption sector. Diesel and gasoline are mainly consumed by the transport sector,LPG by the residential sector.

How to reduce energy consumption in Palestine?

Recently,after the evolution of increasing oil prices,energy has become another major challenge to sustainable development for Palestinian . Thus,the other main goal to achieve is to reduce the energy consumption in Palestine,these can be done by the development of a clear energy conservation and regulation policy.

What is the Palestinian energy strategy?

Accordingly, the Palestinian Energy Strategy is to generate 50% of power locally from gas-fired power plants, import 40% from neighboring countries, and generate 10% from renewable energy sources. By 2026, the plan states that 200 MW of electricity will be generated from solar energy (utility-scale solar PV farms and rooftop solar PV panels).

What sectors are included in the energy balance of Palestine?

The energy balance of Palestine document (2013) identifies only 5 sectors: agriculture,industry,commerce and public services,residential and grid losses. In order to segment the consumption of these sectors,the following methodology has been adopted:

What is the energy policy in Palestine?

The national and comprehensive energy policy is still not clear,weak and fragmented institutional framework and the incomplete framework of Palestine. RE market is strongly affected by the political stability in the region,and the economic situation of the people rises the demand on energy and availability of indigenous resources.

Can solar energy be used for different applications in Palestine?

These values are encouraging to exploit the solar energy for different applications. This study highlights that the main renewable energy sources in Palestine are solar energy,wind energy and biomass,thereby the energy dependence on neighbouring countries may significantly decrease,when Palestine uses the available renewable energy sources.
