

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

How much coal does Panama use?

As of 2016, Panama consumed 330,693 short tons of imported coal and ranked 86th in the world for coal consumption. In September 2021, the Panamanian energy minister announced a push towards clean energy with the notable pillar of ending coal use in power plants by 2023.

How much power does Panama have?

Panama's installed electrical capacity has grown steadily over the last decade. As of 2020, the country had 4116 MW of installed capacity, relying on a mix of fossil fuels (44.2%), hydro power (43.9%), wind (6.6%) and solar (5.2%).

Does Panama have a power station?

Panama's older Bahía las Minas power station has shut down completely, while the newer Cobre Panamá power station has committed to converting to natural gas by December 2023. In 2014, approximately 15 million long tons of thermal coal passed through the Panama Canal.

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

Panama: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Panama is the top energy consumer in Central America and imports more than 80% of its energy. In order to meet consumer demand, Panama is part of the SIEPAC (Sistema de Interconexi3n El3ctrica de los Pa3ses de Am3rica Central), the electrical transmission grid connecting Central American countries.

Panama: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Energy infrastructure development in Panama, as in the rest of Latin America, was conceived under assumptions of climate stability, anticipating minimal or even no changes in climate behaviour over the long term. However, in the past decade, Panama's climate patterns have changed significantly (Ministerio de Ambiente Panama, 2021).

Panama Total Energy Consumption. In 2022, energy consumption per capita was 1.2 toe, including 2 650 kWh of electricity. Total energy consumption has been increasing very rapidly since 2020 (14%/year), following very high economic growth; it reached 5 Mtoe in 2022.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by ...

Panama's National Energy Plan 2015-2050 outlines long-term strategy for the country's energy sector development, including renewables. The Plan established that 15% of Panama's generation capacity will come from renewables by 2030 and 50% by 2050.

In July 2024, the administration of Jos3 Ra3l Mulino took office with a commitment to expanded economic growth and employment opportunities in Panama. The energy sector is a key area of focus and crucial for reaching the new government's goals and objectives.

In July 2024, the administration of Jos3 Ra3l Mulino took office with a commitment to expanded economic growth and employment opportunities in Panama. The energy sector is a key area ...

Panama. Panama has three successful SEZs, all of which have benefitted from and contributed to the country's status as an international shipping hub and one of Latin America's fastest growing economies. The country's oldest SEZ is Colón Free Trade Zone.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
