

Como referencia, para un kit solar para casa aislada se requiere de un mayor número de módulos fotovoltaicos porque se depende únicamente de la energía que estos producen. Un kit solar de red y un híbrido no necesitan de un gran número de módulos dado que su principal función es trabajar en paralelo a su suministro eléctrico. 4.

*Los precios del sistema con panel solar autoinstalable son aproximados y pueden variar. Como se ha podido observar, existe una correlación directa entre el nivel de potencia de las placas solares autoinstalables y su precio. A medida que aumenta la potencia del sistema de paneles solares autoinstalables, también aumenta el precio. Pero como vemos, el desembolso inicial de ...
