

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected 7.5MW solar power plant, located in Mubuga, became operational in 2021.

The pioneering 7.5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the country's first substantial energy generation project to go online in over three decades, supplying clean power ...

The pioneering 7.5MW solar PV plant has increased Burundi's generation capacity by over 10% and is the country's first substantial energy generation project to go online in over three decades, supplying clean power ...

After six years of planning and construction, the 7.5MW Mubuga Solar Power Plant in Burundi, the first of its kind in the East African country has started commercial operations, which makes it the country's first substantial energy ...

The pioneering 7.5MW solar PV plant has increased Burundi's generation capacity by over 10% and is the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses - just before the start of COP26.

This pioneering solar project, proudly supported through UK international climate finance, has increased Burundi's generation capacity by over 10% and is helping propel the country towards a cleaner and more sustainable energy future."

The multinational effort was Burundi's first substantial energy generation project in over three decades, and the 7.5-megawatt solar field is the country's first utility-scale solar power station.

The pioneering 7.5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses - just before the start of COP26.

President Ndashimiye of Burundi attended a ribbon-cutting ceremony at Gigawatt Global's solar power plant in Mubuga, Burundi, the nation's first utility-scale solar field. During the event, President Ndashimiye and renewable developer Gigawatt Global CEO Yosef Abramowitz announced their intention to double the generating capacity near the ...

A pioneering 7.5MW solar PV plant has reached commercial operation in Burundi, increasing the country's generation capacity by over 10%. It's the country's first substantial energy generation project to go online in over ...

Built through a multinational effort, the pioneering 7.5 MW solar PV plant near the village of Mubuga has been in operation since May 2021 and now provides over 10% of Burundi's electricity, supplying clean power to tens of thousands of homes and businesses.
