

What is Cellarhead Bess?

The 300 MW/624 MWh Cellarhead BESS will be connected to National Grid's Cellarhead substation in the West Midlands and will play a critical role in stabilizing the UK electricity grid. The project, unveiled earlier this year, is developed by Atlantic Green in partnership with system integrator Ameresco and clean energy manufacturer Envision Energy.

How much does Cellarhead Bess cost?

As part of the Cellarhead BESS project, it entered into an EPC and O&M deal with Ameresco, involving battery supply, balance of plant, warranty, and availability guarantees. The EPC full wrap price stands at around \$249 million, the companies revealed in May.

What is Cellarhead project?

Called Cellarhead project, it will be connected to the National Grid's Cellarhead sub-station. The BESS project is expected to be connected to the electricity grid by the end of 2026. Credit: Phonlamai Photo/Shutterstock.com.

What is Cellarhead & how does it work?

Called Cellarhead, the project is poised to enhance the UK's energy security and reliability by connecting to the National Grid's Cellarhead sub-station in the West Midlands region of England. The start of construction at the site is expected within this year, with the project's connection to the electricity grid projected for the end of 2026.

Ameresco, Inc., a leading cleantech integrator specializing in energy efficiency and renewable energy, today announced that Ameresco and Envision Energy have been chosen by Atlantic Green to build the Cellarhead project, a 300-megawatt (MW) battery energy storage project (BESS) with a maximum energy capacity of 624 megawatt hours (MWh). The ...
