

The proposed project will construct and operate a photovoltaic (PV) solar facility and associated infrastructure to generate up to 500 megawatts (MW) of renewable electrical energy on approximately 3,371 acres of privately-owned land.

The draft HCP, prepared by Pelicans Jaw Solar, LLC, proposes to construct, operate, maintain, and decommission a 500-MW photovoltaic (PV) solar project located on 3,262 acres of privately-owned grassland. Approximately 2,975 ...

The proposed project will construct and operate a photovoltaic (PV) solar facility and associated infrastructure to generate up to 500 megawatts (MW) of renewable electrical energy on approximately 3,756.46 acres of privately-owned land.

We, the Fish and Wildlife Service (Service), announce receipt of an application from Pelicans Jaw Solar, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act. The applicant requests the ITP to take the federally listed San Joaquin kit fox and blunt-nosed leopard...

Proponent: Pelican's Jaw Solar, LLC Objective: The Project proposes to construct and operate a photovoltaic (PV) solar facility and associated infrastructure which would generate up to 500 megawatts (MW) of renewable electrical energy with a battery energy storage system (BESS) capable of

The Pelicans Jaw Hybrid Solar Project, a 500-megawatt solar facility with battery storage, spanning 3,943 acres of land in Kern County, most of which is in farmland or in the desert region of Southern California.

The draft HCP, prepared by Pelicans Jaw Solar, LLC, proposes to construct, operate, maintain, and decommission a 500-MW photovoltaic (PV) solar project located on 3,262 acres of privately-owned grassland. Approximately 2,975 acres of the project site would be developed with facilities to generate and store solar energy.

Description of Project The implementation of the Pelicans Jaw Hybrid Solar Project would facilitate the construction and operation of a solar photovoltaic facility and associated infrastructure to generate up to 500 megawatts (MW) of

The Project will occur at eight discreet Work Areas within an approximately 3,371-acre hybrid solar development located in northwest Kern County, directly north of Twisselman Road and approximately 0.65 mile east of U.S. Interstate 5.
