

What should be included in a PV system monitoring proposal?

Monitoring shall include revenue-grade metering of PV system production and building consumption, pyranometer, and ambient air temperature sensor. Proposals must include Internet hosting of monitoring with on-line access for Buyer personnel and touchscreen kiosk or video monitor for public display of data.

Who is interested in purchasing a PV system?

Interested parties could include building energy managers, facility managers, and property managers in a variety of sectors, including retail, food service, healthcare, higher education and the public sector. This guide covers each major step in procuring PV: Conducting technical and financial studies ! Financing a PV system ! Procurement !

Where can I find a guide on solar PV installation?

Although each local authority having jurisdiction (AHJ) may have different requirements, the California Department of Forestry and Fire Protection has a widely emulated guide on PV installation<sup>26, 23</sup>. Lisell, T. Tetreault, A. Watson. "Solar Ready Buildings Planning Guide." NREL Technical Report TP -7A246078, p. 26. Dec 2009.

Can solar photovoltaics be installed on commercial buildings?

Better Buildings Alliance members' highest priority for the Team was to help commercial building and owners navigate the decisions regarding installing solar photovoltaics (PV) on commercial buildings. This guide serves that purpose and is intended for anyone investigating the addition of PV to a single or multiple commercial buildings.

What happens if a PV project does not meet the screening process?

If the project does not meet the simplified screening process and requires supplemental review, the applicant might be required to pay for the actual cost of that review or a fixed fee. PV projects that require an engineering review to ensure that the grid is not adversely impacted by the proposed system will face additional fees or charges.

Who should oversee a photovoltaic project?

**Disclaimer** This report should be viewed as a general guide to best practices and factors for consideration by end users who are planning or evaluating the installation of photovoltaics. A qualified professional engineer or firm should always be contracted to oversee any photovoltaic project.
