

Photovoltaic panel cleaning maintenance plan

How often should solar panels be cleaned?

The cleaning may be combined with preventive maintenance of the solar collectors. Solar panel maintenance: this refers to technical maintenance carried out by a professional and should ideally take place once a year. The reason why photovoltaic panels must be cleaned is to ensure solar panel efficiency.

What is solar panel cleaning?

First and foremost, let us introduce the two different terms discussed in this article: Solar panel cleaning: this entails washing the panels like windows. The cleaning may be combined with preventive maintenance of the solar collectors.

Do solar panels need to be cleaned?

Be sure to clean the panels early in the morning before they get too hot from the sun; cold water and hot panels do not mix! Solar panel maintenance and cleaning is not covered under panel warranties, but if your solar panels are damaged, they will usually be covered. Do solar panels need to be maintained?

Should you hire a solar panel cleaning company?

There are a myriad of companies which offer cleaning services for each of these solar panels. Enlisting the aid of a solar panel cleaning company is a reasonable choice for very large installations known as solar farms or solar parks. Why is that?

How are hybrid solar panels cleaned?

Hybrid solar panels are cleaned in the exact same way as a photovoltaic or thermal panel, meaning with soft, lukewarm water and a non-abrasive sponge. As far as the photovoltaic side is concerned, this procedure is identical to that of a classic panel, which consists of verifying the cables, the production housing, and the solar inverter.

How do I clean my solar panels?

Simply log in to your online interface and verify your energy output data. To clean the surface of the panels, all you need is soft, lukewarm water and a non-abrasive sponge. Nothing more. Please be aware that applying cold water to a warm panel could result in thermal shock, thereby damaging your panel.
