

In solar panel installation, piles typically measure anywhere from 7 feet (2.1 m) to more than 25 feet (7.6 m) long. "There were already pile driving attachments on the market that contractors could put on a skid steer ...

Higher water tables can reduce friction and require a pile to be driven deeper than usual. "It can work in any soil condition, and it just depends on mechanical properties of that soil for the friction of how deep that pile has to ...
