

What is a solar pile & foundation?

At Exactus Energy, we specialize in providing thorough solar pile and foundation designs to set you up for success through installation and beyond. Solar pile structures are foundational components supporting solar panel arrays, often composed of durable materials like steel or aluminum.

What are the best helical piles for solar panel Foundations?

Helical Anchors offer the best helical piles for solar panel foundations. Solar foundation systems are important to support the solar panel and protect its foundation from any kind of damage. The Helical Pile System is the most reliable and durable solution for solar panel foundations.

What is a photovoltaic pile driver?

Photovoltaic Pile Driver Configuration Solar Pile Drilling Method - totally three different drilling procedures for PV drilling as following. The pile driver drives the auger into soil directly by rotating, it is only for the soft ground such as soil, sand, soft clay. When drilling for hard formation like rock, hard clay.

What is a hardrock solar pile driver?

Hardrock solar pile driver can drive the pile into soil or rock to support the solar panel for solar power station system and guardrail installation, the common application is for Photovoltaic panels installation. There are several types of Photovoltaic rigs, from manual rig, to semi-hydraulic pile driving machine to fully hydraulic drilling rig.

What is a helical pile for solar panels?

Helical piles have emerged as the most commonly used foundation system for the solar panels. Helical Anchors offers various terminations that are capable of adapting to any sort of solar array connection and structure. Helical piles also have the ability to withstand compressive, tensile and lateral forces which makes them more versatile to use.

How do I choose a pile for a solar farm?

The load-bearing capacity needed for the solar farm is another critical factor in selecting the type of pile. Projects requiring high load capacities--such as those with large, heavy solar panels or in regions with significant wind forces--may necessitate the use of concrete or composite piles.
