

Are ring solar panels compatible with ring devices?

Both of these solar panels are compatible with basically the same Ring devices,so you can basically choose one or the other. Here are a few things to consider before choosing one of these,though: While both solar panels would get the job done,the 4W solar panel is larger than the 1.9W panel.

Are ring solar panels a reliable source of solar energy?

Honestly,Ring solar panels are a reliable source of solar energyfor your Ring devices.

Do ring solar panels work with a battery?

Ring solar panels only work with Ring devices that come with a battery. If a device has no battery,the Ring solar panel can't be used with it. When you choose the Wired mode during installation,the Ring app might treat the device as a wired device and,as such,not recognize the solar panel when it's connected.

How much sunlight does a ring solar panel need?

As the name suggests,your Ring Solar Panel uses solar energy to work: at least 2 to 3 hoursof direct sunlight to be specific. Without enough sunlight,your solar panel becomes practically useless. Solution: Place the solar panel where it can get enough sunlight. It's not enough to simply have the solar panel out during the day either.

Why does ring not recognize a solar panel?

When you choose the Wired mode during installation, the Ring app might treat the device as a wired device and, as such, not recognize the solar panel when it's connected. So, when installing a Ring device with which you'd use the solar panel, choose Battery Mode and not Wired.

Do I need a solar panel for each ring camera?

Yes!You do need one solar panel for each Ring camera. Solar panels and chargers are made to work with just one device at a time. So,if you want to use the solar option for multiple cameras,you'll need a separate solar panel or charger for each camera. Each camera needs its own sunny buddy to keep it charged and running.
