

Photovoltaic panels don't need much maintenance

What maintenance should I do if my solar panel is damaged?

The only other maintenance we recommend is an annual inspection. Your solar installer will likely offer this, but if not, you can request it to ensure your solar system remains in great shape and continues generating renewable energy as promised. If you notice a solar panel has been damaged, contact your installer for guidance and protocol.

How often should solar panels be serviced?

While cleaning your solar panels is important, you should also have your panels serviced regularly by a professional technician. Since home solar systems have very few moving parts, you will only need to book a service visit once per year.

Are solar panels a low-maintenance investment?

Solar panels are a pretty low-maintenance investment. As long as solar panels are installed correctly, they should produce solar power for your home with minimal effort from homeowners. We researched how much maintenance solar panels need to work at peak performance and any associated costs.

Do solar panels need to be cleaned?

Still, things like snow, smog, dust, or dirt can cause a dip in your production, especially during times of low rain. In that case, cleaning your solar panels would be beneficial. Your best and safest option is to hire a professional cleaning service, which your installer should be able to recommend.

How do I take care of my solar panel?

Learn how to take care of your system in our solar panel maintenance guide. Solar panels only require moderate cleaning. They collect the same debris as your roof, including dirt, leaves, insects, cobwebs, and the like. This is especially true after a storm or extended periods without rain.

Are solar panels a good investment?

As you can see, solar panels can be a great long-term investment that require minimal maintenance. However, getting the most out of your new investment requires partnering with a trusted company. There are a wide variety of solar products and solutions on the market, including tiny home solar, portable solar panels, and much more!
