

Photovoltaic panels snow sweeping long broom

Can you use a broom to sweep snow off solar panels?

Similar to a roof rake, a soft-bristled outdoor broom can be used to sweep the snow off the solar panels. Opt for a broom with soft bristles and a telescoping handle to reach high points of the roof, and sweep the snow and ice off the solar panels. Be careful not to scratch the surface. For light, fluffy snow, a leaf blower can be effective.

Can you sweep snow off solar panels?

Sweeping the snow off your solar panels is an option. A broom is an inexpensive tool that you can get and keep in your winterizing kit. But do not use a regular wooden broom, as the hard straw bristles are likely to scratch the surface of the panels. Use an outdoor push broom that has soft bristles.

How to remove snow from solar panels?

A roof rake is another option for removing snow from solar panels. It is a tool used to remove excess snow and debris from the roof of a house. A roof rake has a telescoping arm and acts as a squeegee to pull the snow down to be shoveled. Using them on solar panels is often done, but you should use a lot of caution.

Can a solar panel snow rake remove snow?

Solar panel snow rakes are particularly beneficial for multi-roof households. If you know that your neighbors also have solar panels, you can use the solar panel snow rake to remove the snow from your own panels and the ones on your neighbors' roofs.

Do you need a broom for snow removal?

Ascending to the roof and sweeping off your snowy panels with a broom doesn't require any special equipment and is probably the most cost-effective option for homeowners (as long as you have a broom and ladder). This method obviously poses some serious safety issues. Getting up on your roof is scary enough when it's dry.

How much does a solar panel snow rake cost?

The soft head allows you to quickly clear snow off your solar panels without worrying about scratching or damaging the surface. The best known solar panel snow rake is the Snow-Pro. You can buy the head alone for \$25 or the head and telescoping pole from \$65 to \$150 depending on the length of the pole.
